- compliance with applicable policies, procedures, laws, and regulations

- the integrity and reliability of information, accounts, and data

## Methodology

When conducting the audit, the internal auditor may:

- review the reliability and integrity of financial information and the means used to identify, measure, classify and report such information
- review the means of safeguarding assets and, as appropriate, verify the existence of such assets
- appraise the economy and efficiency with which resources are employed, identify opportunities to improve performance and recommend solutions to problems
- review the established systems to ensure compliance with those policies, procedures, laws, and regulations which could have a significant impact on operations, and determine whether the council complies
- review the operations and activities to ascertain whether results are consistent with objectives and whether they are being conducted as planned
